

# THE UNITED REPUBLIC OF TANZANIA NATIONAL EXAMINATIONS COUNCIL CERTIFICATE OF SECONDARY EDUCATION EXAMINATION

036/1

## INFORMATION AND COMPUTER STUDIES 1

(For Both School and Private Candidates).

Time: 3 Hours

Tuesday, 16th October 2007p.m.

#### Instructions

- 1. This paper consists of sections A. B and C.
- 2. Answer all questions in sections A and B and two (2) questions from section C.
- 3. Calculators and Cellular phones are not allowed in the examination room.
- 4. Write your Examination Number on every page of your answer bookier(s).

#### SECTION A (10 Marks)

For each of the items (i) - (x) shoose the correct answer from among the given alternatives and write its latter beside the item number.

- (1) The device that can eliminate the manual step of keying in the data is called a
  - key-to-disk machine

  - optical senner keypanch markine electrosic register mouse
- (iii) An impact printer gets its name by
  - AB

  - having the same print quality as an electric typewriter transferring a pattern of dots on paper transferring a whole or partial character by striking the ribbon using heat to transfer an image onto the paper areating continuous character images using light.
- (iii) The following is not the function of the control unit

  - To coordinate transfer of data to and from primary storage. To change the sequence in which instructions are executed when directed to do so. To recognize data and to execute instructions.

    To perform arithmetic operations.

    To direct and to control input and output devices.
- (iv). An optical recognizer cut rend

  - magnetically encoded numbers any combination of entitlers and letters but codes in supermarkers electronically encoded patterns specially coded characters or patterns.
- The following is a threet access stonge device:
  - A sape A card A disk

  - A joyatick.
- (NO. A programming language that uses normal sentences in English is called a

  - machine language first generation language procedure-oriented language

  - natural language high level language

(vn) Fundamental steps in developing computer programs and application sufficient include all of the following except maintenance language selection analysis and design supervisor approval amplementation. B B (viii) The REM statement is used to document a program
reserve room in the constituer's memory for subscripted variables
concenber values that are assigned to LEE statements
permit the use of matrix operations
skip one line before executing the next communit A (ix) When used in a TRINT materness, the colon ( ) will result in printing expressions, numbers and missages closer together result in printing expressions, numbers, characters and messages in the next field cause the computer to skip use line before printing must be printing must be printing in the server. 12 (a) Data can be extered directly into the computer system from a serminal when using the TERM statement ENTER manuschi READ materient LET statement INPLY statement SECTION B (10 Marks) Maich the items in his A with the responses in his B by writing the letter of the corresponding response beside the item number. LBT A (i) TAB (ii) LET (iii) Scripted variables (iv) Modern (v) Logical (vi) Structured design (vn) Problem definition (viii) Coding (ix) Coder (x) Technical design.

#### LIST B

- A Allows computies to electrosscally, store, rearrange and print key paragraphs
- B Example of first generation computer
- C Possible carrier with computer manufacturer
- D The use of a device to encode a transform data into digital codes
- E Used in BASIC program to represent lists of table numbers
- F Another name for a computer programmer
- G An error that will not result to an error message
- H A type of number that is only evenly divinible by itself.
- A hardware device that is used in data communication
- J A file organization method that involves among logical records in a given sequence, usually based on key control field in the record.
- K. Will cause the values of the variable to be stared in computer memory.
- i. The activity of producing software in a formal project incommitted
- M. Used to produce attractive output to a computer program.
- N A program that coordinate sequente modules into a one executable program
- O The overall purpose is so find the best pursible way to develop software
- Procedures and rules used to develop data communications software
- Q The step of application development where input requirements are determined
- R. Raise that are used with a personlar programming language
- The process of writing the maximary instructions is a computer programming language
- T A type of implementation promiting

#### SECTION C (40 Mario)

Answer ALL questions in this section.

What does such of the fullowing flowthart symbols represent?

(a)

(c)

- 4. (a) What is the difference between an algorithm and a pseudocode?
  - (b) When numbers are used in a BASIC program, commas should not be included (e.g. 1000 should not be written as 1,000). Why?
- 5. (a) Distinguish boween an assembler and an interpreter as used in programming languages.
  - (b) Explain two circumstances under which you would format a floppy diskette.
- 5. (a) (i) What is a Binury Coded Decimal (BCD)?
  - (ii) Represent the decimal number 2003 as a BCD code.
  - (b) (i) What is a hexadecimal number system?
    - (ii) Convert the bexadecimal number EC to a decimal (base ten) number.
- 7. (a) Why can't we use zero (0) as a step value in the FOR and NEXT loops?
  - (b) Correct errors in the following nested FOR/NEXT loop:

- (c) What rules should be remembered when using nested FOR/NEXT loops?
- 8. What are the qualities of a good algorithm?
- 9. (a) Write a BASIC statement that will join AS and BS and produce CS. If AS = JOSEPH and BS = MILENZO what will CS be equal to after this statement is executed?
  - (b) What is the general format of the LET statement? Give one example.
- 10. (a) List down three program structures,
  - (b) What is data?
- 11. Write down the output of the following program:

3

PRINT "THE END" END

- 12 (a) What are the functions of the main exempty?
  - (b) Line numbers in a BASIC program serve two purposes. What are they?

### SECTION D (40 Marks).

Answer FOUR (4) questions from this section

- (4) Write down the order in which arithmetic operators are evaluated. How are the operators at the same level operated?

  (5) Evaluate the expression [4 \* A /22/] 3 where A = 154. (3 marks)
  - (c) List down the three types of inflantation processing systems. (3 marks)
- 14. (ii) Dry run the following nested FOR/NEXT loop and write down the output.

10 FOR i = 1 To ()\*4)STEP -4
20 FOR j = 1 To 2 STEP -1
30 FRINT i, j
40 NEXT j
50 NEXT i

(6 marks)
(b) (i) What is a variable?
(ii) Differentiate a numeric variable from a string variable
(3 marks)

15. (a) What steps are followed in setting up a counter for loop control? (3 marks)

(b) What input statements are available in BASIC? Explain the use of each statement.

(4 marks)

(b) What is the need of using RESTORE statement?

(3 marks)

16. (a) What is the advantage of using arrays? (4 marks)

(b) Write a BASIC program which prints the largest number in an array of 10 numbers.

17. (a) Development of a program can be broken down into ass phases. State them. (6 marks)

(b) Differentiate library functions from user-defined functions. (4 marks)

 (a) Explain three types of errors which a programmer may encounter when preparing a BASIC program. (6 marks)

(b) (i) What is an email? (I mark
(ii) List two advantages and two disadvantages of the email. (3 marks)
