(viii) Stops any texts from moving up or down the screen. *D*	K	Page down
(ix) Moves cursor to the next pre-set positions that is, either forward or backward. *L*	L	Right Arrow
(x) When pressed together with the control (Ctrl) key it sends the cursor to the top most pages in the same document. *I*	M	Down Arrow

3

3. In the following items, write **(T)** for True statements and **(F)** for False statements.

(i) The start and shortcut keys perform special functions in windows operating system. _T_

(ii) On a network, data is transmitted in small groups called packets. _T_

(iii) Tags such as those indicating bold, strong and emphasis are included in the category of basic formatting tags. _T_

(iv) Word processing programs can only work with texts. _F_

(v) Any type of information can be placed once the structure of a database is established. _F_

(vi) Annotations are notes that accompany graphs in excel. _T_

(vii) The multimedia development process usually involves the efforts of a group of people. _T_

(viii) Your e-mail address is completely private. _T_

(ix) A menu bar enables to view different parts of the file that does not fit in the window. _F_

(x) A primary key is a foreign key field of one database table that also appears in another table in the same database. _F_

SECTION B (50 Marks)

Answer **all** questions in this section.

4. With examples briefly describe each of the following as used in databases:
   (i) Field   (iii) File   (v) Relational database.
   (ii) Record   (iv) Key field
                                                                                          (10 marks)

5. (a) Switching on a computer which was not powered on before is called _bootstrap_
                                                                            (0.5 mark)

   (b) Restarting a computer which had already been switched on is called _reboot_
                                                                            (0.5 mark)

   (c) Explain the features of a computer system abbreviated as **WIMP**.
                                                                            (04 marks)

6. (a) Explain briefly the meaning of "data processing".
                                                                            (01 mark)

   (b) Briefly give four reasons to show the advantages of processing data electronically. (04 marks)

   (c) (i) Identify three tasks of the main memory of the computer. (1.5 mark)
        (ii) Why do computers require a storage device despite having the main memory? (2.5 marks)

4

7. (a) How does word processing differ from data processing? (02 marks)

(b) Distinguish Desktop Publishing from Word processing. (02 marks)

(c) (i) How do a spellchecker confirm the correct spelling of a word? (01 mark)
(ii) Why would a spell checker reject correctly spelt words? (01 mark)
(iii) How is a spellchecker made to accommodate new words? (01 mark)

(d) Explain briefly each of the following in relation to document formatting:
(i) Margins (iii) Orientation
(ii) Page size (iv) Headers and Footers. (04 marks)

8. (a) Differentiate Internet from Email. (02 marks)

(b) (i) What does the abbreviation URL stand for? (01 mark)
(ii) Describe the main parts of a URL. (02 marks)
(iii) How does HTML differ from http? (02 marks)

9. Describe briefly the types of computers as classified according to size. (08 marks)

SECTION C (20 Marks)

Answer two (2) questions from this section.

10. Explain the advantages of using Computer Networks. (10 marks)

11. Identify the major types of computer software and explain how they relate in the functioning of the computer system. (10 marks)

12. Illustrate the relationship among the basic components of the computer system. (10 marks)
